The map of oil and gas field boundaries were created by the Reserves and Production Division, Office of Oil and Gas, Energy Information Administration pursuant to studies required by Section 604 of the Energy Policy and Conservation Act Amendments of 2000 (P.L. 106-486). The boundaries are not informed by subsurface geological information. The data and methods used in their creation are detailed in a report, "Scientific Inventory of Onshore Federal Lands Oil and Gas Resources and Reserves and the Extent and Nature of Habitats to Their Development," prepared by the US Department of Interior, Agriculture and Energy. Map created September 2005; projection is UTM-16, NAD-27. Authors: Sam Lumerick (1), Lucy Luo (1), Clay Long (2), David Blumhouse (2), Jack Perrin (1), Steve Jackson (1) and Robert King (2).
